PROFESSIONAL SUMMARY

Frontend Developer with experience in **React**, **Next.js**, and modern CSS frameworks such as **Tailwind CSS**. My background in design allows me to effectively integrate visual and technical solutions, providing a comprehensive approach to development.

WORK EXPERIENCE

DavaiSNami - *Event search and city event listings for Saint Petersburg*

Website: <https://davai-s-nami.vercel.app/>, GitHub: <https://github.com/elfototo/davai-s-nami>

Frontend Developer March 2024 - Present

- Developed a web application using **React**, **Next.js**, and **Tailwind CSS** with **responsive design** and **Telegram Web App** integration, serving **500+** active users per month.
- Optimized state management with **Redux** and caching with **SWR**, reducing redundant API requests by **30%**.
- Simplified the filtering system architecture, reducing the time to add new filters from 2-3 hours to 1 hour of development.
- Improved page load speed by **15-25%** through image optimization (WebP), lazy loading, and code splitting.

Key Technologies: React, Next.js, Redux, Tailwind CSS, JavaScript (ES6+), SWR, REST API integration, dayjs, React Hook Form, Telegram Web Apps, Git, docker

Iskra AE - *Auto parts, hookah, and tea products sales company.*

Websites: <https://iskramotor.market/>, <https://watta.market/>
